## **Wireless Internet ♦ VoIP ♦ DSL ♦ Digital Dial-Up**

Wireless Internet Technician

Starting Pay: \$10.00 - \$14.00/hour

### **Duties include:**

1. Installation & Configuration of outdoor broadband wireless hardware
2. Cat5e cable installation and termination
3. Configuring customer's equipment to access Internet

### **Additional Requirements for Wireless Internet Technician:**

This is a Full-Time position that requires a well rounded technical person. We are looking for a self motivator whom needs little or no supervision to complete daily tasks. Daily tasks range from troubleshooting software configurations to programming wireless equipment; many different skills and abilities are required.

The employee is responsible for providing efficient and pleasing service to customers by conveying and maintaining a professional attitude on all customer contacts. Employee must handle all customer contacts in a courteous and considerate manner.

### **The employee will be required to:**

1. Lift and carry up to 50 lbs.
2. Carry and deploy 25 foot extension ladders
3. Work off of all heights of a 25 foot extension ladder
4. Be comfortable climbing up to and working on second story roofs

This job requires extensive roof work in all weather situations. Almost every installation involves roof mounted wireless equipment. Some limited tower climbing is required. Installers are expected to run CAT5 in an aesthetically pleasing and concealed manner. At times the CAT5 may be in or need to be installed in a crawl space or other confined area.

### **Required Education and/or Experience:**

1. PC Network Configuration
2. Hand Tool Aptitude
3. Ethernet CAT5 termination experience
4. Driver's License with a clean record
